ARBOR SIFT 1500

The **Arbor Sift** combines robust construction with ease of use for a quality output. Fitted with an easy key start 12 HP diesel engine. Fine material is discharged via the conveyor belt and large material is retained in the drum. By reversing the drum the large's are thrown out. This machine is built to very high standards, the **Arbor Sift** has a generous capacity and is ideal for anyone wishing to make a quality screened compost.
